BẢN QUYỀN TÀI LIỆU THUỘC VỀ: ÔN THI OPIC TIẾNG ANH

Question 1: Ideas on what good health is and how to maintain health change frequently.
What did people do to maintain good health when you were a child?
What was considered to be a healthy diet at that time?
How did people usually exercise?
Describe how people's thoughts on what is healthy have changed over time.

Answer:
When I was a kid, people thought about staying healthy by eating lots of fruits and veggies. We used to play outside for exercise. Now, things have changed. People care more about specific nutrients and different ways to stay active. It's become more about what each person needs and likes.

Question 2: Describe a healthy person you know of.
What makes that person healthy?
Tell me everything that makes that person healthier.

Answer:
I know someone who is really healthy. They eat lots of fruits and veggies and exercise regularly. They also get enough sleep and drink plenty of water. This person takes care of their mental health too, by managing stress and taking breaks when needed. Overall, their balanced lifestyle makes them a healthy person.

Question 3: Have you ever changed a habit or a certain lifestyle for your health?
Maybe you started to work out or started to eat healthy.
Tell me about that change you made.

Answer:
Yes, I changed how I live for better health. I started moving more, like walking and doing easy exercises. I also ate more fruits and veggies and less sugary snacks. It was a bit hard at first, but I felt better and had more energy after a while. Making small changes helps a lot.

Question 4: Talk about one thing that you did for your health in detail.
What kind of impact did it have on your health?
Tell me about the effect that had on your health.

Answer:
I decided to walk for a bit every day. It was easy, and soon I felt more energy and less stressed. Walking became a good habit, and I felt healthier. Even my sleep got a bit better. Small changes can make you feel better!

Good luck For Your Exam!
